

Theramax™ Mobile Surgical/Dental Wet Station

A revolutionary new veterinary lift table combining mobility, multifunctional use, and practicality all within a small footprint space saving design. Designed by a veterinarian with over 20 years professional experience, the Theramax™ surgical / dental wet procedures station is the first of its kind that offers this comprehensive versatility. As a hybrid veterinary surgical / wet prep table, positioning animals for skull radiography, dental therapy, surgery, or routine ear flushings all become effortless. True mobility means no more dedicating precious clinic space around cumbersome “fix-mounted” surgical or dental equipment. The Theramax™ is a self-contained option-expandable surgical / dental solution that grows as your business needs do.

All Models Feature:

- Compact design maximizes space efficiency with integrated components
- Variable-height design for sitting or standing
- Electronic medical-grade lift motor for smooth & quiet operation
- Medical-grade lockable castors for easy placement in multiple rooms
- Removable wet basin and drainage conduit for easy cleaning
- Adjustable 15°/30°/45° stainless steel V-fold panels
- Adjustable 2°/5°/7° horizontal tilt of tabletop
- 4 easily adjustable tie-down restraint anchors
- Industrial-grade foot control switch for height adjustment
- Built-in supply storage under table [Non-Dental Models Only]
- 250lb lift capacity
- Multi-outlet power connectivity
- Articulating arm with instrument tray attachment *
- Articulating laptop tray for digital radiography *
- IV Poles *

* Available Options

Dental Model Features:

- Integrated silent compressor unit
- Dual 1-liter reservoir self-contained clean water system
- Easily accessible compressor tank release valve
- 28" articulating arm supporting a three-handpiece automatic-control head with a three-way air/water syringe [handpieces / drillkit optional]
- Articulating arm with instrument tray attachment *
- Piezo / Ultrasonic scaler *
- High-speed drill with Fiber Optic light source *

* Available Options

Specifications:

Top Dimensions: 65.25" x 18.5" | 130 x 60 cm

Electronically Height Adjustable: 27" - 43"

Lifting Capacity: 250 lb | 113 kg

Power Supply: 120V/60Hz

Theramax™ Mobile Surgical/Dental Wet Station

The Theramax™ Advantage

The Theramax™ is a fully mobile wet station. Clinic space limitations sometimes make non-moveable or wall-mounted traditional “liftstyle” tables obstructive with little flexibility. Medical-grade locking castors facilitate patient transport to any room in the hospital. This allows the practitioner to take patients from anesthetic induction, to therapy, to recovery, and back to their holding area without physically moving the animal from the station. Cleanup afterwards is simple. Removable components can be washed at a sink, eliminating the need for expensive fixed plumbing.

There are two base models: the Theramax™ SX which is well suited for surgical and diagnostic work and the Theramax™ DX which adds dental function to the station. The SX model can be easily expanded to include the dental DX options as needed. With either base unit the practitioner has the choice of many additional features to further enhance productivity and practice growth. Options include fluid poles, instrument or laptop trays, integrated piezo/ultrasonic scalers, and a variety of high-speed handpieces.

- The V top allows for easy patient positioning in dorsal recumbency, while the table can be tilted 2°/ 5°/ 7° from the horizontal position. This allows for greater speed and less fatigue in performing dental cleanings since the staff member can visualize and clean all arcades and perform intra-oral radiographs without flipping the patient.
- The robust electric lift and foot pedal allow for hands-free height adjustment while maintaining optimal ergonomic operator positioning. Whether seated or standing, the station can be fine-tuned to staff members' individual height requirements.
- The dental console [Theramax™ DX] stores neatly underneath the table and folds out via articulating arms for maximum adjustability. This helps prevent accidental bumps during patient induction and streamlines the station during transport.
- The reliable silent air compressor has a 1.5 gallon storage tank which minimizes motor cycling thereby extending its life. Draining the tank after use is a quick task via the easily accessible drain valve.
- The self contained dual liter water system allows the operator to perform many dental cleanings between refills of the reservoir.
- The robust basin, grill, and V trough are easily removed for cleaning at a sink. This eliminates the need for expensive fixed plumbing or an under table pail which interferes with the operator when seated.
- The clear high impact Lexan® grill comes in different configurations to allow instrument tray inserts. This diminishes searching for instruments on traditional stands.
- Space-saving under-the-table storage [Theramax™ SX only] provides quick access to those supplies and surgical packs you need most, saving you time and allowing for ultimate mobility and efficiency.
- With the Theramax™ SX/DX models, versatility and ease of use translate into increased procedure speeds and practice revenues.
