TEL (410) 828-5005 / FAX (410) 296-5512  
 WWW.ANIMALDENTALTRAINING.COM

"I consider the Animal Dental Training Center (ADTC) to be the premier dental training facility in the country, if not the world!! Veterinarians having experienced the ADTC and its' expert faculty are positively enthusiastic about the facility and the quality of continuing education. I recommend the ADTC without reservation for state-of-the-art continuing education in small animal dentistry and oral surgery."

**Mark M. Smith, VMD Dipl. ACVS, AVDC**  
 Center for Veterinary Dentistry & Oral Surgery - Gaithersburg, MD  
 Past Editor, Journal of Veterinary Dentistry

"Thank you for a fantastic experience. By having every participant have their own work station you allow each person to move at their own pace, maximizing the value of the course. I had no previous dental radiology or endodontic experience and left with the knowledge, skill, and confidence to begin these procedures in my practice. You thought of every detail from the Internet directions to dinner out at night. You go out of your way to be sure every participant has a rewarding experience."

**David Cloutier, DVM**  
 Veazie Veterinary Clinic - Veazie, Maine

"Thanks again for a great CE experience. They have been the best CE courses I've had in the 20 years since graduating from veterinary school. The courses in radiology, surgery, and endodontics have enabled me to make dentistry the most gratifying aspect of my small animal practice."

**Robert Baratt, DVM**  
 Salem Valley Veterinary Clinic - Salem, CT

"Thank you for an outstanding educational program! Although I have attended many continuing education courses over the years, this is the first program I have attended that I have actually spent more time in the education process than waiting in line to use the equipment. It made my dental learning experience both educational and enjoyable. You definitely make learning fun!"

**Wayne Creel, DVM**  
 Haywood Road Animal Hospital - Greenville, SC

### ABOUT THE CENTER

Since January 2000 the Animal Dental Training Center (ADTC) has held **over 350** classes across all topics in Veterinary Dentistry & Oral Surgery. Today it remains the premier facility for those seeking an unparalleled comprehensive and "hands-on" veterinary dental continuing education experience. Small class sizes, individual workstations, interactive lectures, and an open forum approach to learning make classes at the ADTC a truly unique and professionally rewarding experience. Some of the benefits of education at the center include:

- A **State-of-the-Art** teaching facility featuring 24 high/low speed workstations, multiple digital radiography systems, and video projection for procedure playback throughout the facility. Each station is equipped with a complete set of instrumentation for the courses taught. Spend more time engaged in learning instead of searching and sharing instruments or waiting to use the equipment.
- Students work at their own pace at individual workstations. The low teacher-to-student ratio ensures participants receive highly personalized attention addressing their specific questions and needs.
- All faculty members of the ADTC are Diplomates of the American Veterinary Dental College (AVDC) or have passed the credentialing process of the AVDC. They are selected not only for their technical merits, but their dedication to teaching and enthusiastically imparting knowledge to students.
- Participants earn Continuing Education credits from the State of Maryland, and for some courses, RACE accreditation. All materials and necessary equipment are provided in addition to full course handouts. Each course also includes daily on-site breakfast and lunch in our newly renovated lounge.
- The ADTC provides an "open forum" for discussion amongst both national and international participants about topics ranging from animal dentistry to practice management and marketing strategies. The information gained is both practical and can be easily implemented. The relaxed atmosphere is conducive to learning or simply renewing one's passion for veterinary medicine.

## PROGRAM INFO

### Clinical Advantage: Tech Workshop

Solely for the Dental Technician. Topics include: dental anatomy, pathology and radiology. The laboratory section covers radiographic techniques, dental prophylaxis, charting and utilization of Doxirobe, in addition to instrument sharpening and care.

### Oral Surgery 1 / Radiology

This program encompasses surgical extraction indications, instrumentation, and techniques for both dogs and cats. Learn about clinical pathologies of the oral cavity and their radiographic interpretations while working hands-on to develop the techniques necessary to get quality images every time.

### Oral Surgery 1+2 / Radiology | 3-DAY

For those ready to tackle more advanced clinical procedures, Oral Surgery 1+2 includes our Level 1 program (as detailed above) while further building on surgical extraction technique and indications. Level 2 focuses on both oncologic surgery and its reconstruction along with trauma evaluation and surgical repair. Participants will become proficient and proactive in their assessment of oral neoplasia and trauma from diagnosis through the therapeutic approaches for both these pathologies.

**CANCELLATION POLICY:** In the event of a cancellation you may also send a substitute from your practice. Due to the limited number of spaces available, requests for full refunds will be honored only if received at least 21 calendar days prior to the start of the program. A partial 75% refund will be issued for all requests received 8-20 days before the beginning of the course. No refunds will be granted for cancellations made less than 8 days prior to the course onset. All requests must be received in writing. In the unlikely event that a program is canceled or postponed due to insufficient enrollments or unforeseen circumstances, the ADTC will fully refund registration fees but cannot be held responsible for any other expenses, including cancellation or change charges assessed by airlines, hotels, travel agencies, or other organizations.

## PROGRAM INFO

### Endodontics 1 / Radiology | 3-DAY

For beginner and intermediate levels; This program examines the indications, instrumentation, materials, and techniques for vital pulpectomies, and root canal therapy for single and multi-rooted teeth.

### Exclusively Feline Workshop | 3-DAY

Our 3-day **feline-only program** is for beginner and intermediate levels. Topics include: oral pathology, radiology, endodontics, and restorative materials. On the final day, participants concentrate on oral surgical extractions and eotomies for oncologic surgery.

### Fundamentals of Dentistry | 3-DAY

One of our most popular programs, this hands-on program was designed to quickly bring practitioners with little or no previous experience with oral disease recognition and treatment “up to speed.” Combining the essential disciplines over 3 days; Radiology, Oral Surgery and Periodontal disease treatment will be taught through interactive lectures and focused wet-labs. Doctors will learn clinical anatomy, the complete dental exam with charting, oral prophylaxis in addition to open curettage and bone augmentation.

## COURSE INSTRUCTORS

**DR. IRA LUSKIN**  
Diplomate AVDC, Diplomate EVDC

Dr. Ira Luskin has been involved with small Animal Dentistry & Oral Surgery since 1979. He established the Animal Dental Center in 1990 and founded the Animal Dental Training Center in 2000 as a teaching facility for veterinarians and technicians.

**DR. MARY VOLKER**  
Diplomate AVDC

Dr. Mary Krakowski Volker graduated from Iowa State University College of Veterinary Medicine with high honors. A Pennsylvania native, she returned east and completed her residency with the Animal Dental Center in 2013 and passed her specialty board examination in 2014.

**DR. JENNIFER TJEPKEMA**  
Practice Limited to Dentistry & Oral Surgery

Dr. Tjepkema began her career as a practice associate in Virginia for 6 years before opening her own clinic to focus exclusively on patients' oral care and dental needs. After completing her 3 year dental residency program in California she joined the ADC in 2017.

**DR. JASON HUTT**  
Practice Limited to Dentistry & Oral Surgery

Dr. Jason Hutt graduated as a member of the charter class of St. Georges University College of Vet. Medicine in 2003. After 13 years in general practice as an associate veterinarian in Liverpool, NY, Dr. Hutt began his residency in dentistry and oral surgery at Animal Dental Center in July 2016.

**DR. INSHIL KIM, MBA**  
Practice Limited to Dentistry & Oral Surgery

Dr. Inshil Kim earned both a veterinary degree and MBA from St. Matthews University on Grand Cayman in 2003. A true believer in her role as a pet's advocate, Dr. Kim joined the Animal Dental Center to start her formal residency in veterinary dentistry in July 2016.
