"Providing the very best for veterinary dentistry"

Dear Customer:

To ensure that your new **Sopix USB** digital x-ray sensor performs as promised, please review this final **Sopix Checklist**.

❑ Veterinary digital radiography requires hands-on positioning training. Please contact Dental Focus™, LLC if you need additional training. We can recommend many options and levels of training.

❑ Please contact Dental Focus™, LLC if you need **Sopro Remote Software Training**. This requires a **computer** with *high-speed Internet service*. To schedule remote training call: (908) 968-3553.

❑ Follow these tips to ensure *proper care* of the **Sopix USB Sensor**:

   ❑ Always use **Protective Sensor Sheaths** in order to protect the sensor from moisture. <u>NOT</u> using **Protective Sensor Sheaths** voids sensor warranty. Contact Dental Focus™, LLC when you need to purchase additional **Protective Sensor Sheaths**.

   ❑ For additional protection, we recommend **wrapping your sheath-covered sensor with Vet Wrap** to prevent the sensor plate from slipping in the patient's mouth. Using **Vet Wrap** also helps prevent scratches and helps to keep your sensor looking like new.

   ❑ Never leave an animal unattended, for any reason with the sensor in their mouth. We have only a 2% bite rate of sensors and the majority of bites result from multi-tasking. We recommend removing the sensor from the animal's mouth as soon as you are done shooting the X-ray, and then waiting until after the animal is off the table to mark the X-rays.

   ❑ If a patient must be kept light while under anesthesia, use a plastic mouth gag when shooting dental X-rays. The rule of thumb should be that if you would not put your hand in the animal's mouth, the sensor should not be put in the animal's mouth.

   ❑ Mount the sensor to avoid dropping.

   ❑ Do not have sensor cord crossing active walkways.

   ❑ Never kink cords or tug/pull the sensor cord to remove the sensor from the animal's mouth.

❑ Review all information on this **Sopix Checklist** with all current/new employees who use the **Sopix Sensor** and **Sopro Software**.

❑ Contact your insurance company to confirm if you are covered for damage (accidental) outside the manufacturer's warranty.

❑ For **Sopix/SOPRO Technical Support,** call **1-800-289-6367 Option 3**.

If you have any questions please give us a call.
