- Graphics Card Nvidia or ATI 2 GB Unshared Memory
- Screen Resolution 1920 x 1080 or More
- Ethernet Board 1Gbps
- Power Supply 200 Watts or Higher

Important:

The computer should be in view when shooting images. This allows you to see images as you work on cases and see mistakes instantly. We suggest a wireless mouse and keyboard or a computer in reach when shooting. Walking across a room is not a good workflow and can lead to damaged equipment.
